

Position Statements

Compilation of Corporate Positions on Key Topics — 2025 Edition

Climate Change

Do Sender Chemicals acknowledges the scientific consensus on climate change and recognizes the chemical industry's responsibility to contribute to global climate solutions. We support the goals of the Paris Agreement and are committed to reducing our greenhouse gas emissions in line with a 1.5°C pathway.

Our climate position is guided by three principles: (1) measure and reduce our own emissions, (2) innovate low-carbon solutions for our customers, and (3) engage our value chain partners in collective climate action.

Water Stewardship

We recognize water as a critical shared resource. As a chemical manufacturer in Shandong Province, we are committed to responsible water management. Our position is to minimize water withdrawal, maximize recycling and reuse, and ensure all effluent meets or exceeds regulatory standards before discharge.

We support the UN Sustainable Development Goal 6 (Clean Water and Sanitation) and actively participate in local watershed protection initiatives.

Responsible Chemistry

We are committed to the responsible development and use of chemical products. This includes rigorous product safety assessment, proper hazard communication, and promotion of safe handling practices throughout the product lifecycle.

Our product stewardship program covers regulatory compliance, occupational exposure assessment, environmental fate analysis, and customer safety support. We are a signatory to Responsible Care® and actively participate in the China Responsible Care program.

Sustainable Sourcing

We prioritize suppliers who demonstrate responsible environmental and social practices. Our sustainable sourcing approach includes evaluating suppliers on ESG criteria, promoting local sourcing where feasible, and working collaboratively with suppliers to improve their sustainability performance.

Diversity & Inclusion

Do Sender Chemicals is committed to building a diverse and inclusive workplace where all employees feel valued and respected. We believe that diversity of thought, background, and experience strengthens our organization and drives innovation.

We promote equal opportunity in recruitment, development, and advancement, and maintain a zero-tolerance policy for discrimination and harassment.

Animal Testing

Do Sender Chemicals does not conduct animal testing on our products unless required by applicable regulations for safety assessment purposes. Where regulatory requirements do not mandate animal testing, we prioritize the use of alternative non-animal testing methods and in silico approaches.
